

## **Airframe / Powerplant Maintenance Technology**

### **Gainful Employment Disclosures**

#### **COST:**

##### **Q. How much will this program cost?\***

A. Tuition and fees:	\$ 8,928
Books	350
Tools	300
On-campus room and board	<u>20,810</u>
Total (two calendar years)	\$ 30,388

\*The amounts shown above include various current costs for the entire program, assuming normal time to completion. Please note that this information is subject to change.

#### **FINANCING**

##### **Q. What financing options are available to help pay for this program?**

A. Financing may be available through grants, scholarships, loans (federal and private), veterans' benefits, and institutional financing plans.

#### **SUCCESS**

##### **Q. How long does it take to complete this program?**

A. The program is designed to be completed in two (2) calendar years, assuming continuous enrollment.

##### **Q. What are the employment opportunities upon graduation?**

A. After licensing by the Federal Aviation Administration, the aviation maintenance technician has bright prospects for employment in the industry world-wide. Typical pay ranges from \$15-\$40 per hour and beyond, depending upon geographical area, experience level, and employer. Currently, there are not enough technicians to fill available positions. Industry predictions indicate that this condition will continue for fifteen years or more. The local airline has hired nearly every one of our graduates who has applied.
